

# Lever House Primary School

Learning, Creativity and FUN!

## Our Vision

Our school curriculum is designed to achieve a number of things which we view as vital. These are to:

- Develop children's curiosity and encouraging a hunger for new learning, throughout their lives
- Develop independence, resilience and confidence
- Build a solid foundation, not only for a child's school career, but also for life in the future as responsible, active citizens of the world
- Create a collection of memorable learning experiences and broadening horizons, both within the classroom and in the wider environment
- Offer an exciting, first opportunity to explore different curriculum subjects
- Provide the opportunity for pupils to develop knowledge and skills, which can be applied in a variety of contexts across all areas of life
- Deepen children's understanding of other cultures, communities and faiths and promoting Fundamental British Values
- Recognise that whilst academic achievement is important, it is not the only measure of success.
- Ensuring every child has equal access to the curriculum through a mastery based approach but also to develop children's understanding of equality and diversity.
